

Wheelchair accessibility for home or public buildings over straight stairways

Folds up compactly when not in use leaving access to the stairs

Custom order for your specific needs

# Savaria™ ES-125 Lift

## ACCESS OVER STRAIGHT STAIRS

The Savaria ES-125 inclined platform lift provides access over stairs for wheelchair users as it travels along a guide rail. When not in use, the unit folds compactly to the wall, leaving access to the stairs. Unfold the unit and the dual access ramps automatically lower to provide easy access to the non-skid platform. The ES-125 lift is a popular choice for churches, schools and homes where access over a straight flight of stairs is needed.

To suit a range of installation requirements, the lift is available in two models, the Standard and Plus. The Standard model requires a machine room – under the top landing or staircase – to house the drive mechanism, thereby hiding it out-of-sight. The Plus model houses the drive in a tower located at the top of the stairs, a good solution when it is not possible to locate the drive remotely.

# Savaria™ ES-125 Lift

## ACCESS OVER STRAIGHT STAIRS

- Folds up compactly (14" to 16"/35.5 cm to 40.6 cm) from the wall when not in use allowing easy access to the stairs and providing wheelchair access as needed
- Durable construction and reliable components to stand up to day-to-day use even in commercial settings
- Easy installation, often without major construction requirements
- Configure for straight through access or 90° entry/exit with a variety of platform sizes available
- Safety features include: non-skid platform, automatic dual access ramps, emergency brake, slack cable switch, keyed operation and emergency lowering hand crank
- Options include: three-position manual safety arms, motorized safety arms, side flaps, motorized platform folding/unfolding, hard-wired or wireless remote control (hand pendant), outdoor package, folding seat with seatbelt, audio visual alarm, fire service function, custom color paint
